ROSEDALE NURSERIES

Sawmill River Parkway

TARRYTOWN . . . NEW YORK

Common Sense Planting

A planting of trees and shrubs is the most enduring type of investment. A reasonable number of well chosen, and properly grown trees and plants will grow and increase in beauty and usefulness every year of their lives. They will provide shade, screen undesirable views, control moisture in the soil, prevent erosion and provide windbreaks longer, without depreciation, than the most rugged man made devices. An investment in trees is an investment in ever increasing beauty and value.

Plan Your Planting—Too many persons believe that a landscape can be planted in a hit or miss fashion. This method can never become anything but a hodge-podge which eventually will have to be renovated at additional expense. There is only one way you can be assured of a fine planting and that is by consulting a reputable nurseryman. Let us draw up a planting plan that will be both practical and original. To draw up such a plan that will not quickly out-grow its location takes not only creative ability on the part of the planner, but a practical knowledge of plants. Our experts have both these requirements and they are ready and eager to serve you. This plan can be executed in sections entailing no great initial expense, but when completed will give you a very effective setting for your home.

Variety and Service—Our nursery is large enough to include a complete and exceedingly varied line of planting material that will satisfy your every need. We are, however, small enough to give you the personal service that is so desirable. Selection of stock is made with your particular requirements in mind and the actual planting is done by one crew of men and personally supervised by the head of our nursery.

We are prepared and equipped to improve the grounds of your home whether a complete new planting is required or a renovation of existing planting where the careful placing of a few new plants is desired. An estimate involves no obligation and your examination of the stock at the nursery is especially invited.

Special Offers—With the hope that we will be able to make many new friends, we are offering many popular items at special low prices. These varieties are shown with a line top and bottom.

Location — Rosedale Nurseries is located on the new Sawmill River Parkway midway between Eastview and Hawthorne, N. Y. with private entrances on the Parkway. Mail address is Tarrytown, N. Y. Telephone Tarrytown 2620. See map on back cover.

Terms — Cash or satisfactory references wherein accounts are due in thirty days—no discounts. Cash sales makes possible present prices.

Guarantee—Trees and shrubs purchased from us at prices listed herein, which die with-

in six months from date of delivery, will be replaced where care and attention has been given after planting. The customer to pay delivery charges and cost of planting. This guarantee does not cover losses due to conditions beyond our control, such as severe droughts or unusually severe Winters.

Order Early — Early orders will receive early attention. Spring planting season is short at best.

H. C. Taylor
Proprietor

Our Special Recommendations

Old or new, these varieties cannot be beat for individuality or beauty. Admired by all, known by few and here they are at prices for anyone. Both evergreen and deciduous subjects are listed.

CERCIDIPHYLLUM japonicum (Katsura-tree). A slender, young tree branching from the ground, developing into a magnificent spreading tree at maturity. Foliage purple tinged and heart-shaped. A rare and beautiful deciduous tree.

10 to 12 ft.....\$10.00

CRYPTOMERIA japonica lobbi. An irregular columnar evergreen, dark green in Summer, turning to a beautiful shade of bronze in Winter. Type and arrangement of foliage make it most picturesque.

5 to 6 ft.....\$7.00

6 to 7 ft..... 8.00

ILEX opaca (American Holly). The well known Christmas Holly with red berries. Both male and female plants should be planted to produce berries.

2 to 3 ft.....\$2.75

3 to 4 ft..... 3.50

LIQUIDAMBAR styraciflua (Sweetgum). A most interesting and satisfactory shade tree. It likes moisture and grows to immense size. The star-shaped leaves are blazing scarlet in Fall. Very resistant to insects.

10 to 12 ft.....\$6.00

CRYPTOMERIA JAPONICA LOBBI

PICEA moerheimi (Improved Blue Spruce). Similar to Koster's Blue Spruce with brighter steel blue color and a more compact growth. The very finest in Blue Spruces.

2½ to 3 ft.....\$7.00

3 to 3½ ft..... 9.00

PYRACANTHA lalandi (Laland Thorn). Semi-evergreen, retaining some foliage all Winter in protected locations. Bears an abundance of orange berries in clusters in the Fall. Very effective against stone work.

2 to 3 ft.....\$2.50

3 to 4 ft..... 4.00

TAXUS hicksi (Hicks Yew). An interesting form of the most useful Taxus family. Exceptionally dark green needles. Taxus hicksi grows in an upright columnar shape.

18 to 24 in.....\$2.00

2 to 2½ ft..... 3.50

3 to 4 ft..... 5.00

TAXUS hunnewelliana (Hunnewell Yew). Somewhat similar to Japanese Yew except for a more uniform perfect vase shape. Very fine for foundation planting or low hedges.

18 to 24 in.....\$3.50

2 to 2½ ft..... 5.00

ILEX OPACA

To secure privacy and to prevent the intrusion into the garden picture, of an unsightly building on an adjacent property, fully developed evergreens were used here to conceal its discordant features. We have a large collection of trees suitable for screening which we are offering at reduced prices.

Evergreen Trees

Three reasons why Rosedale Evergreens have become famous: (1) They are oft transplanted, to develop a mass of fibrous roots and compact growth. (2) Our expert system of packing. (3) Our soil is such that the burlapped ball will reach you in solid form

PSEUDOTSUGA · Douglas-fir

Colorado Variety

The Douglas Spruce or Fir is the tree for the million. It would be difficult to over-rate its beauty. Its horizontal branches, with pendulous branchlets richly clothed with bright green foliage, render it a striking object in the landscape. The trees are hardy in Canada and endure both drought and cold. Those we planted at Lenox, Mass., in 1908, 1000 feet above sea level in the Berkshires, have stood that trying climate as well as the hardest varieties known, and the foliage appears as bright and fresh in Spring as in Autumn.

The Opinion of an Eminent Authority

We quote from a most excellent article on evergreens by the late E. H. Wilson in the December (1915) *Garden Magazine*: "The Douglas-fir is one of the most valuable of all coniferous trees, and, from a horticultural viewpoint, one of the most indispensable. In the Arnold Arboretum, Boston, trees forty years of age are 50 feet and more tall and others about fifteen years old are 18 to 25 feet tall. The lower branches of these trees sweep the ground and the others incline upward and have a plumelike appearance. Either as a lawn tree, or for avenues, or for massing, the Douglas-fir is equally valuable and it needs no commendation."

The Douglas-fir will stand almost as much shade as the Hemlock and is unharmed by the severest winds.

PSEUDOTSUGA · Douglas-fir

 Specimens, 18 to 25 ft....\$80.00 to 100.00

JUNIPERUS • Juniper

All the Junipers are valuable ornamental plants—the upright species as single specimens or in groups and the low forms well adapted for rocky slopes or banks. Junipers thrive best in a sandy, loamy soil, moderately moist, but do well in rocky and gravelly soils in sunny, open situations.

Chinensis columnaris. A very hardy, spire-like evergreen with gray-green foliage. Highly recommended.

<i>Each</i>		<i>Each</i>

Virginiana cannarti. A columnar evergreen with very dark green foliage. Similar in growth and habit to our native Redcedar.

<i>Each</i>		<i>Each</i>	
3 to 4 ft....	\$3.00	5 to 6 ft....	\$8.50
4 to 5 ft....	5.00	6 to 7 ft....	12.00

Virginiana glauca (Silver Redcedar). Tree of compact, conical habit. Bright, silvery foliage.

<i>Each</i>		<i>Each</i>	
3 to 3½ ft...	\$4.00	5 to 6 ft....	\$9.00
3½ to 4 ft...	5.00	6 to 7 ft....	12.00
4 to 5 ft...	7.00		

Virginiana keteleeri. Named for a landscape architect in Paris. This comparatively new variety is never attacked by aphid or blight. It grows in pyramidal form and is of very pleasing light green color, which it maintains during Winter.

<i>Each</i>		<i>Each</i>	
3½ to 4 ft...	\$3.50	5 to 6 ft....	\$6.50
4 to 5 ft...	4.50	6 to 7 ft....	8.00

PICEA • Spruce

No group of evergreens is more widely used in landscape work than the Spruces, and many of them are among the most showy and rapid-growing of their class. Spruces will grow in almost any kind of moderately moist soil, and are easily transplanted.

Canadensis (White Spruce). A native tree of medium size, varying in height from 25 to 50 feet. It is of pyramidal form and very shapely in appearance.

Large specimens..... Prices on request

Engelmanni (Engelmann Spruce). Resembles the familiar Colorado Blue Spruce. A compact grower and develops into a grand tree. Among the many sorts of Spruces, native and foreign, the Engelmann stands distinct.

<i>Each</i>		<i>Each</i>	
2 to 3 ft...	\$4.50	3½ to 4 ft....	\$7.50
3 to 3½ ft...	6.00		

Excelsa (Norway Spruce). No evergreen is more generally planted than this because of its exceedingly rapid growth and extreme hardiness, which adapt it for shelter and massing for effect. It will grow 3 ft. annually when well established.

<i>Each</i>	
2 to 3 ft.....	\$0.75
3 to 4 ft.....	1.25
4 to 5 ft.....	3.00

Large specimens, 8 to 35 ft. Prices on request

Glaucia albertiana conica (Alberta Spruce). A dwarf form of dense, narrow-conical habit, with thin, slender leaves.

<i>Each</i>		<i>Each</i>	
4 to 6 in....	\$1.00	12 to 15 in...	\$3.00
6 to 9 in....	2.00		

Orientalis (Eastern Spruce). The deep, glossy green foliage is smaller and more dense than that of the other Spruces and brighter and richer than that of the Norway Spruce. It is a tree of remarkable beauty. Our stock of this beautiful species is a wonder to all who visit us.

<i>Each</i>	
2 to 3 ft.....	\$3.50

Large specimens, 18-35 ft. Prices on request

PINUS • Pine

The Pines are essentially inhabitants of poor, sandy soils and dry situations. Their stout root-systems enable them to seek scanty water supplies where other species find it difficult, and they thrive in any good soil.

Pinus excelsa.

<i>Each</i>	
4 to 5 ft.....	\$5.00

Mugho compacta, Hill's (Dwarf Mountain Pine). This compact variety of Mugho is now taking the place of the ordinary form. It forms a dense bush and keeps below 4 feet in height.

<i>Each</i>	
9 to 12 in. broad.....	\$0.75
12 to 15 in. broad.....	1.50
15 to 18 in. broad.....	2.25
18 to 24 in. broad.....	3.00
2 to 2½ ft. broad.....	4.00

PINUS—Continued

PINUS STROBUS (White Pine)

Nigra austriaca (Austrian or Black Pine). This flourishes near the seacoast and on high, bleak hills or in cities where smoke and dust would prohibit the use of many other evergreens.

Each		Each	
3 to 3½ ft...	\$3.50	6 to 7 ft.....	\$8.00
4 to 5 ft...	5.00	7 to 8 ft.....	10.00
5 to 6 ft...	6.00		

Resinosa (Red Pine). Native in northeastern states and Canada. It is often planted in places where no other Pine will grow. Its luxuriant, dark green foliage and vigorous growth make it an important Pine for bold effects. Very hardy and adapts itself to many situations and soils.

Each		Each	
4 to 5 ft...	\$2.50	6 to 7 ft. heavy.	\$8.00
5 to 6 ft...	5.00	7 to 8 ft. heavy.	10.00

Strobus (White or Weymouth Pine). This is beautiful in every stage of its growth, from a seedling to a stately tree of 150 ft. Whether we consider its economic importance, its adaptability to climate and soil, or its ornamental use, we must give it chief place among our native Pines. No other evergreen fulfills so well the requirements for rapid growth, beauty, and harmony in the landscape and quick effect as a screen, and none transplants more easily. Our large specimens, 35 ft. high and 18 ft. broad, may be moved with perfect safety.

Each		Each	
4 to 5 ft....	\$3.00	7 to 8 ft....	\$8.00
5 to 6 ft....	4.00	8 to 9 ft....	12.00
6 to 7 ft....	5.50	9 to 10 ft....	16.00
Specimens, 12 to 40 ft....	\$25.00 to 250.00		

RETINOSPORA • Chamaecyparis

Retinosporas thrive best in moist soils and situations not too much exposed to Wintry gales.

Filifera. Very graceful, with its long, drooping tips, ending in slender tassels. The color is a most beautiful deep green.

Each	
2½ to 3 ft.....	\$3.50
3 to 4 ft.....	5.00
4 to 5 ft.....	7.50
Larger specimens.....	\$15.00 to 60.00

Filifera aurea. Golden variety of the preceding, and the most graceful of all the Retinosporas. It is scarce and expensive. Pure golden foliage Winter and Summer.

Each	
2 to 2½ ft.....	\$3.00
Specimens, 10 to 15 ft....	\$30.00 to 60.00

Obtusa gracilis. Beautiful, compact form, graceful in habit, with rich dark green, lace-like foliage.

Each	
3 to 3½ ft.....	\$3.75
Larger specimens.....	\$18.00 to 75.00

Obtusa nana compacta. Very dwarf, dark green, irregular foliage. Extremely interesting plant for rockwork or low planting.

Each	
10 to 12 in.....	\$2.50

Pisifera. Fine, leathery foliage; delicate branches.

Each		Each	
3 to 4 ft....	\$2.50	5 to 6 ft....	\$5.50
4 to 5 ft....	4.00		

Pisifera aurea. A beautiful golden form with the same delicate foliage as R. pisifera. Growth tessellated and very wavy; vigorous habit. One of the best.

Each	
3½ to 4 ft.....	\$2.00
4 to 5 ft.....	3.50
5 to 6 ft.....	5.50

Plumosa. Light green, soft, feathery, plume-like foliage. Very graceful habit.

Each		Each	
2½ to 3 ft...\$1.00		3½ to 4 ft...\$2.50	
3 to 3½ ft... 1.50		4 to 5 ft... 3.50	
Larger specimens.....	\$35.00 to 125.00		

Squarrosa veitchi. A handsome, glaucous tree of striking appearance and color.

Each		Each	
3 to 3½ ft...\$1.50		4 to 5 ft....\$5.00	
3½ to 4 ft... 2.50			

TAXUS • Yew

The Yews are very desirable evergreens, densely clothed with dark green foliage. They thrive best in a moderately moist, sandy loam, and endure shade well.

Baccata repandens. This dwarf, spreading form with its beautiful foliage and graceful, drooping branches is unique among evergreens.

Each	
15 to 18 in. broad.....	\$1.50
2 to 2½ ft. broad.....	4.00

Canadensis. This Canadian Yew has the same habits as T. baccata repandens. The foliage is lighter green.

Each		Each	
12 to 18 in...\$1.50		18 to 24 in...\$2.50	

TAXUS—Continued

Cuspidata (Japanese Yew). Dense, spreading habit. Deep green foliage. Especially useful near the house. Very hardy. <i>Each</i>			
15 to 18 in. spread.....			\$1.25
18 to 24 in. spread.....			2.00
2 to 2½ ft. spread.....			3.00
2½ to 3 ft. spread.....			4.50

Cuspidata brevifolia . Dwarf, compact, and very hardy. <i>Each</i>			
12 to 15 in... \$1.25	18 to 24 in...		\$3.00
15 to 18 in... 2.00	2 to 2½ ft....		5.00
Larger specimens.....\$15.00 to 25.00			

Cuspidata capitata (Upright Japanese Yew). Upright tree form of <i>T. cuspidata</i> . Very desirable for foundation planting as it is of slow growth. Best of evergreen hedges. <i>Each</i>			
2 to 2½ ft.....			\$3.00
2½ to 3 ft.....			4.00
3 to 3½ ft.....			5.00
4 to 5 ft.....			8.00
Specimens, 5 to 6 ft.....			\$16.00 to 20.00
Stock unusually heavy.			

THUJA · Arborvitae

Ornamental evergreen trees of narrow, pyramidal habit. They are favorites for formal gardens because of their regular, symmetrical habit. Adapted for hedges and wind-breaks. Thrive best in a somewhat moist, loamy soil; easily transplanted.

Occidentalis (American Arborvitae). Beautiful native tree, commonly known as White Cedar. Especially useful for hedges and screens. <i>Each</i>			
3 to 4 ft.... \$1.25	5 to 6 ft.....		\$3.00
4 to 5 ft.... 2.50	6 to 7 ft.....		5.00
Specimens.....\$12.00 to 35.00			

PYRAMIDAL ARBORVITAE

Occidentalis pyramidalis (Pyramidal Arborvitae). The deep green color and upright pyramidal form of this species render it conspicuous in contrast with other evergreens. It is very hardy and vigorous. This particular Arborvitae we highly recommend for an evergreen hedge. <i>Each</i>			
3 to 4 ft.... \$1.25			
4 to 5 ft.... 2.50			
5 to 6 ft.... 4.00			

Occidentalis sibirica. This forms a beautiful, compact specimen without shearing. Foliage is full and of a peculiar dark green color throughout the year. *Each*

2½ to 3 ft.....	\$3.00
3 to 3½ ft.....	4.00

Occidentalis spiralis. Compact tree, with upright branches and short, close set branchlets clothed with beautiful dark foliage. *Each*

3 to 4 ft.....	\$3.00
4 to 5 ft.....	4.50

Occidentalis woodwardi. Dense, globe-shaped variety which maintains its shape without shearing. The foliage is a pleasing sea green in Summer; in Winter, bronze. Perfectly hardy. Grows about 3 ft. high. *Each*

15 to 18 in... \$1.00	24 to 30 in... \$2.50
18 to 24 in... 1.50	

TSUGA · Hemlock

We still have a magnificent stock of Hemlocks, notwithstanding the fact that this tree has been so scarce that we have supplied landscape architects and purchasers from Philadelphia to Boston. Of the larger sizes, we have a number of specimens worth from \$75.00 to \$250.00. We also have a fine stock of smaller sizes up to 5 to 6 feet.

The extensive use of this noble tree may be judged by the fact that it is one of our three best sellers, the other two being Douglas-fir and White Pine.

Canadensis. A handsome ornamental tree growing 70 to 100 ft. high. Dark green foliage. Hardy as far north as Canada. *Each* 10

2½ to 3 ft.....	\$1.35	\$12.00
3 to 3½ ft.....	1.75	15.00
3½ to 4 ft.....	3.00	28.00
4 to 5 ft.....	4.50	40.00
5 to 6 ft.....	6.00	50.00
6 to 7 ft.....	8.00
7 to 8 ft.....	10.00

Large specimens, 8 to 35 ft.....\$15.00 up

Special prices on large quantities for naturalistic planting or hedges. Ask for quotation, stating quantity needed.

Caroliniana (Southern Hemlock). Native of the mountains of the Southern States and perfectly hardy here in the North. A beautiful tree with dark green foliage and a habit of growth which makes it distinctly different from our Canadian Hemlock. *Each*

4 to 5 ft.... \$5.00	7 to 8 ft.... \$12.00
5 to 6 ft.... 7.50	8 to 9 ft.... 15.00
6 to 7 ft.... 9.00	9 to 10 ft.... 25.00

We suggest replacing Winter injured Privet hedges with all year evergreen hedges of Arborvitae, Hemlock, Japanese Yew, etc.

An attractive group planting of Broad-leaved Evergreens, giving continuous bloom for a long period and a glossy green effect the entire year.

Broad-leaved Evergreens

No class of plants when well grown gives more satisfaction than the Broadleaved Evergreens. They are beautiful at all seasons of the year. Not only does this class include the most gorgeous flowering plants, but the foliage of some in Winter is even more beautiful than in Summer, especially the Leucothoe and Mahonia, whose leaves take on the finest shades of red from bronze to intense scarlet. Our nursery is especially well supplied this year with both large and small sizes of Leucothoe, Mahonia, Mountain-laurel, and Rhododendron. All of these plants are native to America.

AZALEA

Amoena. Bright rosy purple flowers in great profusion in May. *Each*
 15 to 18 in. \$1.25
 18 to 24 in. 3.00

Hinodegiri (Evergreen Azalea). Flowers bright red. A great improvement on the color of Azalea amoena. *Each*
 10 to 12 in. spread. \$1.25
 12 to 15 in. spread. 1.75
 15 to 18 in. spread. 2.50
 18 to 24 in. spread. 4.00

Indica, J. T. Lovett. Brilliant carmine like blooms. Foliage deep green with metallic shadings. Blooms late. *Each*
 2 to 2½ ft. \$6.00

Kurume, Flame. Bright madder red with coppery suffusion; glossy green foliage. *Each*
 10 to 12 in. \$1.75

Macrantha. Large, single, salmon red flowers. Very late. Glossy foliage. *Each*
 2 to 2½ ft. \$5.00

Mollis. Flowers in shades of yellow, terra cotta, apricot and golden salmon. *Each*
 15 to 18 in. \$1.50 | 18 to 24 in. \$2.50

BERBERIS • Mahonia

Aquifolium (Hollyleaved Mahonia). Beautiful at all seasons of the year. In Winter the prickly, shiny, purplish leaves turn to the finest bronze and crimson. Very desirable with Rhododendrons and Laurel.

<i>Each</i>		<i>Each</i>
15 to 18 in. \$1.00	2 to 3 ft. \$3.00	
18 to 24 in. 1.50	3 to 4 ft. 6.00	

DAPHNE

Cneorum (Garland Flower). Low growing evergreen shrub with clusters of very sweet-scented pink flowers in May and August. Fine for rock gardens. *Each*

9 to 10 in. spread. \$0.90
12 to 15 in. spread. 1.25
15 to 18 in. spread. 1.75

ILEX • Holly

Crenata. Rapid grower. Smooth green leaves. *Each*
 3 to 4 ft. \$4.00 | 4 to 5 ft. \$6.50

Glabra. Upright, bushy. Dark green leaves. Black berries. *Each*
 1½ to 2 ft. \$2.50

KALMIA

Latifolia (Mountain-laurel). Thrives in any good soil that is not impregnated with lime and grows well in either sun or shade. Glossy green leaves the entire year. Masses of showy flowers in June.

<i>Nursery-grown Specimens.</i>	<i>Each</i>	<i>10</i>
1 to 2 ft.....	\$2.00	\$15.00
2 to 3 ft.....	3.00	25.00
3 to 4 ft. with spread of 3 to 5 ft.	7.00

Deciduous
Flowering Shrubs
HARDY NATIVE AZALEAS

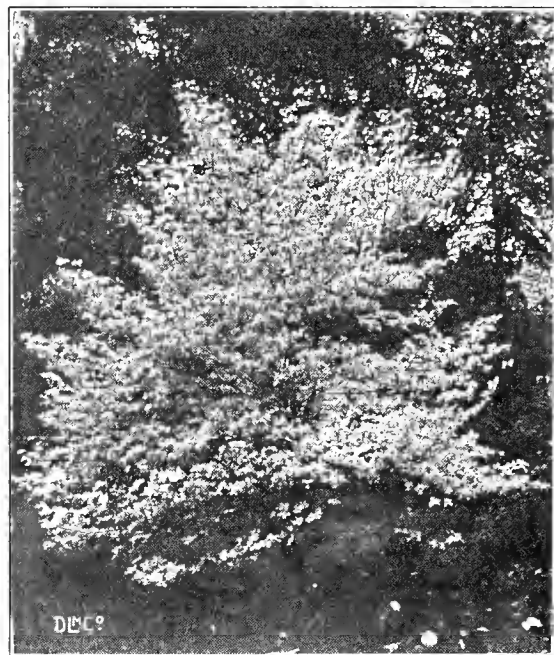

AZALEA calendulacea (Flame Azalea). A brilliant flowering shrub with clusters of yellow and orange flowers in June. Thrives in full sun or half shade. 2 to 2½ ft..... \$2.75

A. nudiflora (Pinxterbloom). A hardy native variety flowering in varying shades of pink. 18 to 24 in..... 1.75

A. vaseyi (Pinkshell Azalea). Most handsome of all native Azaleas. Shell pink flowers in May. Foliage turns deep crimson in Fall. 2 to 2½ ft.... 3.00

Flowering Trees

There are more than a dozen Flowering Trees that will provide a wealth of exquisite blossoms in the Spring. Between the sturdy loveliness of the native Dogwood and the exotic daintiness of the Japanese Cherry, there is infinite variety of color, form, and fragrance. A planting of flowering trees is an investment in ever-increasing beauty.

CORNUS (Dogwood)

CERCIS • Redbud; Judas-tree

Canadensis (American Judas-tree). A desirable ornamental specimen with large, heart-shaped leaves and bright pink flowers arriving before the foliage appears. May be used in the shrub border.

<i>Each</i>	
2 to 3 ft.....	\$1.00
3 to 4 ft.....	1.50
4 to 5 ft.....	2.75

Japonica (Doubleflowering Japanese Redbud). A dwarf, doubleflowering sort of the above.

<i>Each</i>	
2 to 3 ft.....	\$2.25
3 to 4 ft.....	\$3.50

CRATAEGUS • Hawthorn

Coccinea (Thicket Hawthorn). White flowers in May, followed by red fruits which are retained until late Fall.

<i>Each</i>	
4 to 5 ft.....	\$2.00
5 to 6 ft.....	3.00

Oxyacantha. Tree with spreading branches and stout spines. Single, white, sweet-scented flowers, rarely pink. Scarlet fruit.

<i>Each</i>	
4 to 5 ft.....	\$1.75
5 to 6 ft.....	\$2.50

Oxyacantha splendens (Paul's Scarlet Thorn). Double scarlet flowers. Late Spring bloomer. One of the finest.

<i>Each</i>	
4 to 5 ft.....	\$1.75
5 to 6 ft.....	2.50

CORNUS • Dogwood

Florida (White Dogwood). A native flowering tree attaining about 20 ft. in height at maturity and producing a wealth of single white flowers before the leaves appear. The foliage is deep green turning a brilliant red in the Autumn.

<i>Each</i>	
2 to 3 ft.....	\$1.00
3 to 4 ft.....	1.50
4 to 5 ft.....	2.25
5 to 6 ft.....	3.00
6 to 7 ft.....	5.00

<i>Each</i>	
7 to 8 ft.....	\$6.00
8 to 10 ft.....	7.50
10 ft. speci-	
mens. Prices	
on request.	

Florida rubra (Pink or Red Dogwood). Similar to our native white Dogwood in habit and form but with masses of pink flowers.

<i>Each</i>	
2 to 3 ft.....	\$1.50
3 to 4 ft.....	3.00
4 to 5 ft.....	4.50

<i>Each</i>	
5 to 6 ft.....	\$6.00
6 to 7 ft.....	8.00

Kousa (Japanese Dogwood). A Japanese tree with dense branches more shrublike than American Dogwood. Creamy white flowers in July with conspicuous scarlet fruits attractive to birds.

<i>Each</i>	
2 to 3 ft.....	\$2.00
3 to 4 ft.....	3.50
4 to 5 ft.....	4.75

MALUS • Flowering Crab

Atrosanguinea (Carmine Crab). A very showy variety with rich red blossoms. Considered the best of the Flowering Crabs.

<i>Each</i>	
3 to 4 ft.....	\$1.25
5 to 6 ft.....	\$4.00

Floribunda. A single, rose pink variety bearing an abundance of fruit even when young.

<i>Each</i>	
3 to 4 ft.....	\$1.00
4 to 5 ft.....	2.00

<i>Each</i>	
5 to 6 ft.....	\$3.25

Ioensis bechteli (Double Pink Crab). A very fine variety with double pink flowers resembling a miniature Rose. Makes a shapely, compact tree.

<i>Each</i>	
4 to 5 ft.....	\$2.00
5 to 6 ft.....	2.50

Scheideckeri. Similar to M. floribunda, with double pink flowers and yellow fruit. Flowers last well.

<i>Each</i>	
3 to 4 ft.....	\$1.00
4 to 5 ft.....	2.00
5 to 6 ft.....	3.00

SORBUS · Mountain-ash

Aucuparia (European Mountain-ash). Well-formed tree with small leaves and bearing large clusters of orange red berries.

	Each	10
6 to 8 ft.....	\$2.50	\$22.50
8 to 10 ft.....	3.50	30.00
10 to 12 ft.....	5.00

WISTERIA

Treeform. Rosedale has for many years made a specialty of Wisterias trained into Treeform. The Grapelike clusters of lavender flowers are borne in profusion seldom seen on the vine, due to the severe pruning which is necessary to create the tree form.

Each	Each
2 to 3 ft.....\$2.00	4 to 5 ft.....\$5.50
3 to 4 ft..... 3.00	5 to 6 ft..... 8.00
Larger specimens.....	\$10.00 to 15.00

Soulangiana. Pink.	Each
3 to 4 ft.....	\$5.00
Specimens 8 to 9 ft.....	15.00
Stellata. White.	Each
2 to 3 ft.....	\$5.00
Nigra purpurea. Purple.	Each
3 to 4 ft.....	\$5.00
Lennei. Red.	Each
3 to 4 ft.....	\$6.50

OXYDENDRON

Arboreum (Sorreltree). A comparatively dwarf tree bearing an abundance of white flowers in Midsummer. The foliage turns several shades of red and crimson in Fall. Seldom seen in the Fall without being admired.

Each	Each
3 to 4 ft.....\$2.50	5 to 6 ft.....\$6.00
4 to 5 ft..... 4.00	8 to 9 ft..... 8.00

PEACH

Double Redflowering. One of the prettiest sights in Spring when covered with its red blooms.

4 to 5 ft.....	Each
	\$1.00

JAPANESE FLOWERING CHERRIES

PRUNUS**Flowering Cherries and Plums**

Subhirtella pendula (Japanese Weeping Cherry). A pendulous form of well known Flowering Cherries so admired at Washington, D. C. Bears a profusion of single pink flowers in early Spring.

Each
5 to 6 ft., 2 yr. heads.....\$2.50
5 to 6 ft., 3 yr. heads..... 4.00
Larger specimens.....15.00

JAPANESE UPRIGHT CHERRY**Serrulata spectabilis rosea**

Fugenzo. Double, rose pink flowers in early Spring.

Kwanzan. Large, double, pink flowers. Vigorous; quick growing.

Shirotae. Pure white, double flowering Cherry.

Yoshino. Fragrant, white flowers in clusters; early Spring.

<i>All Japanese Upright Cherries.</i>	Each
4 to 5 ft.....	\$2.50
5 to 6 ft.....	4.00

Triloba plena (Flowering Plum). Bright pink, double, quilled flowers in early Spring.

3 to 4 ft.....	Each
	\$1.00

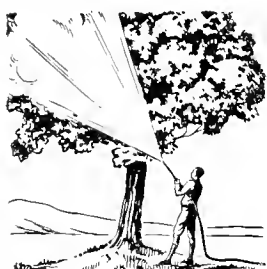

A WEALTH OF MATERIAL FOR INTEREST

A garden has no equal in creating interest and self expression. To develop the home grounds to the highest degree of beauty and enjoyment new and different types of plants must be added from time to time. **Rosedale Nurseries** has this point always in mind in the growing and exhibiting of a wider range of material at each new season. We now offer 75 varieties of evergreens alone, with 50 varieties of shade and ornamental trees and 100 varieties of deciduous flowering shrubs, together with scores of perennials, more than 100 colors and types of Iris and 150 different shades of the finest Peonies in the world. A complete planting for any grounds

Take Care of Your Trees

Don't make the mistake of taking your trees for granted. This is a common error of many home owners. They have real value, as you would quickly find out should you have to make a replacement. It takes many years to grow a fine specimen, which, if weakened through neglect, can be ruined in a few moments during a severe storm. Trees eat, breathe, and become diseased—just like humans. It, therefore, is necessary to call in an expert at intervals to inspect and suggest how to keep them in a healthy condition.

Spraying ✕ ✕

Trees are attacked by many insects. Some chew the leaves and others suck the sap from the leaves and bark. There is but one way to check these pests and that is by spraying at the proper seasons. A properly

sprayed tree is adequately protected thru the entire season.

Pruning ✕ ✕

Dead and dying limbs in your trees are not only unsightly, but also provide a breeding ground for insects and diseases. Therefore, pruning is highly important to the appearance and health of trees and consists of the removal of all dead, diseased, inter-

fering, and undesirable limbs, and the painting of all cuts with a compound which waterproofs, preserves, and acts as an antiseptic.

Feeding ✕ ✕

The first step in preserving your trees is to keep them well-nourished. An undernourished tree, like an underfed person, is susceptible to disease and the attacks of insects and borers. In our forests, trees are fed by decaying leaves. This, of course, does

not occur where trees are growing around homes as the leaves are raked up and not allowed to rot. Therefore, it becomes necessary to feed them artificially.

Tree Surgery ✕ ✕

In certain cases where decay has penetrated far into the tree, surgery is necessary. This is a highly scientific procedure and should only be attempted by experienced workmen. Our men, under the expert direction of Mr. Jenner, are capable

of handling any work of this type you may need.

Bracing ✕ ✕

The beauty and symmetry of a tree are often lost by storm damage. This can be prevented by the proper bracing of structurally weak trees.

✕ ✕

We wish to impress upon you the fact that we want only

satisfied clients and our aim is to advise only the essential work at extremely moderate prices. You will be pleasantly surprised to learn how economically you can give your trees proper care. Have your trees inspected yearly and attend to the necessary work. You will find this way most economical.

✕ ✕

It will cost you nothing and place you under no obligation to call in our Mr. Jenner for advice on the treatment of your trees. He is waiting for YOUR call, so don't put it off. The longer that infection is left, the farther it will penetrate into the tree, and the more money it is going to cost to repair it. Get in touch with us today.

Shade Trees

At Rosedale we grow especially good Shade Trees. The soil insures good root systems, which are retained when the trees are dug. We allow room in the nursery for proper development of trunk and top, and grow only the trees that succeed under conditions in our selling territory. Our list of varieties includes trees for almost every purpose.

ACER · Maple

The Maples are universally popular. They have attained this reputation because they are regular in outline, vigorous growers, beautiful in foliage, and adapt themselves to almost any soil. The Norway Maple is one of the best and most largely used of the Maples. It is especially desirable for street planting, thrives well near the sea and is one of the hardiest and most easily transplanted of them all. (In very wet soil use Planetree).

- Palmatum atropurpureum** (Redleaved Japanese Maple). A comparatively dwarf Maple, slow in growth and attaining ultimately about 20 ft. in height. Bright red foliage and branches. These are exceptionally well grown specimens.
- Each

2 to 3 ft.....\$5.00

3 to 4 ft.....7.50

4 to 5 ft.....10.00

ACER (Maple)

- Platanoides** (Norway Maple). Foremost of the Maples because of its regular outline, wide spreading branches and deep green foliage which is retained well after the first heavy frosts.
- Each

1¾ to 2 in. caliper.....\$4.50

2 to 2½ in. caliper.....6.00

2½ to 3 in. caliper.....8.00

3 to 4 in. caliper.....12.00

4 to 5 in. caliper.....22.50

Larger specimens, 6 to 12 in. caliper.
\$40.00 to 125.00

- Platanoides schwedleri** (Schwedler's Maple). A variety of Norway Maple having red leaves until Midsummer.
- Each

1¼ to 1½ in. caliper.....\$3.50

Large specimens, only 6 to 12 in. caliper.....\$50.00 to 150.00

- Saccharum** (Sugar Maple). A beautiful tree of upright form. Attains a greater height than the Norway Maple and colors yellow and red in Fall.
- Each

2½ to 3 in. caliper.....\$6.00

3 to 3½ in. caliper.....10.00

Large specimens, 6 to 14 in. caliper.....\$50.00 to 200.00

BETULA · Birch

- Alba** (European White Birch). A very handsome white-barked tree usually seen growing in clusters. Especially effective in Winter against a background of evergreens.
- Each

6 to 8 ft....\$2.00

8 to 10 ft....3.00

Collected clumps. Prices on application.

Each

10 to 12 ft....\$5.00

- Alba purpurea** (Purpleleaved White Birch). New. Good form with dark purplish foliage, white bark.
- Each

5 to 6 ft.....\$4.00

6 to 8 ft.....\$6.00

FAGUS · Beech

- Sylvatica** (European Beech). For a screen or hedge, this Beech is ideal among deciduous trees. It gives nearly as much screen in Winter as in Summer, owing to the fact that the dead leaves persist in Winter. As it bears the shears well, it may be kept within bounds for hedge purposes and grows as dense as any hedge. We have a fine lot of these trees, about 12 to 14 ft. high, that would give an immediate effect. They may be handled with ball and burlap, although it would not be as necessary as the roots have been well developed from occasional root-pruning.
- Each

Specimens.....\$10.00 to \$65.00

LARIX · Larch

- Decidua** (European Larch). One of the most handsome trees in Spring. Foliage like a soft evergreen. Loses its needles in Winter.
- Each

8 to 10 ft.....\$6.00

POPULUS · Poplar

- Caroliniana** (Carolina Poplar).
- Each

10 to 12 ft.....\$2.00
- Fastigiata** (Lombardy Poplar).
- Each

8 to 10 ft.....\$1.50

10 to 12 ft.....2.00

Quantity prices on application.

QUERCUS • Oaks

The Oaks, especially when they attain size, are the most picturesque of all trees, symbolizing strength and durability. Their reputation as slow growers is not warranted, for, when once established, they will make a yearly growth equal to that of almost any other species.

Palustris (Pin Oak). A superb and distinct tree, the Pin Oak's graceful, drooping branches support a mass of deeply lobed, sharply pointed leaves, changing to deep red in Autumn. Jack Frost has never shown greater skill than in the coloring he produces in the Pin and Scarlet Oaks. *Each*

1½ to 2 in. caliper.....\$7.00

2 to 2½ in. caliper..... 9.00

2½ to 3 in. caliper.....15.00

3½ to 4 in. caliper.....22.50

Large specimens.....\$25.00 to 150.00

Rubra (Red Oak). *Each*

1½ to 2 in. caliper.....\$7.00

Large specimens.....\$50.00 to 150.00

Coccinea (Scarlet Oak). *Each*

1½ to 2 in. caliper.....\$7.00

SALIX • Willow

Babylonica (Weeping Willow). *Each*

8 to 10 ft.....\$2.25

10 to 12 ft..... 3.50

TILIA • Linden

Extensively planted as an ornamental tree. Nearly all the species are of rapid growth and not very particular as to soil. They are handsome, upright, and regular in shape. The flowers have a pleasant odor.

Americana (American Linden). Especially noted for its great vigor, large, heart-shaped leaves and very fragrant flowers in June. No flowers produce so delicious a honey as those of the American Linden.

Each | *Each*
12 to 15 ft...\$8.00 | 15 to 18 ft...\$15.00

Large specimens.....\$25.00 up

TILIA (Linden)

QUERCUS PALUSTRIS (Pin Oak)

Argentea (Whiteleaved or Silver Linden). Beautiful as lone specimens. Broad, shapely habit; leaves almost white beneath. A native tree not of the largest size but with the most beautiful flowers of all the Lindens. *Each*

Specimens.....\$10.00 up

Platyphyllos (Broadleaved Linden). Vigorous, ornamental, select tree of very rapid growth and handsome, symmetrical form, making a splendid specimen and shade tree. *Each*

Specimens.....\$10.00 to \$30.00

Tomentosa pendula (Weeping Silver Linden). Especially graceful tree with handsome foliage silvered on the underside. *Each*

Specimens, 20 to 25 ft...\$35.00 to \$100.00

Vulgaris (Small-leaved European). *Each*

1½ to 2 in. caliper, 10 to 12 ft.....\$7.00

ULMUS • Elm

Americana (American Elm). As the Oak is preeminent in dignity and majesty, the Elm is preeminent in grace and elegance. The graceful, umbrella-shaped top, borne high above the other trees, always adds to the landscape picture. It is not particular as to soil and makes a delightful shade as it does not branch low. *Each*

2½ to 3 in. caliper.....\$6.00

3 to 3½ in. caliper..... 9.00

3½ to 4 in. caliper.....15.00

4 to 8 in. caliper.....\$25.00 to 100.00

Pumila. A rapid growing tree with slender, drooping branches. Fine for street planting, and thrives in barren positions in both drought and heat. *Each*

2 to 2½ in. cal., 8 to 10 ft.....\$6.00

2½ to 3 in. cal., 10 to 12 ft..... 8.00

Hardy Perennials

- Strong, field-grown plants, 25c. each, 1 \$2.50 per doz., except as noted**
- Achillea eupatorium.** Flat heads of brilliant yellow flowers.
- Aconitum napellus** (Monkshood). Dark blue.
- Aconitum sparki.** Dark blue.
- Aquilegia, Mixed** (Mrs. Scott Elliott's Hybrids). Long spurred, all colors.
- Armeria formosa Hybrids.** Shades of pink.
- Artemisia lactiflora.** Small white flowers.
- Astilbe.** Pink.
- Astilbe.** White.
- Baptisia australis.** Indigo blue.
- Cerastium tomentosum.** White flowers.
- Chelone lyoni.** Purplish red.
- Chrysanthemum.** Yellow.
- Clematis recta.** Pure white flowers in showy clusters.
- Coreopsis.** Yellow. 15c. each, \$1.50 per doz.
- Delphinium Belladonna.** Clear light blue.
- Delphinium Bellamosa.** Dark blue.
- Delphinium, Vanderbilt Hybrids.** All colors. 30c. each, \$3.00 per doz.
- Dianthus** (Hardy Pink).
- Funkia caerulea lanceolata.** Blue flowers.
- Gaillardia, The Dazzler.** Golden yellow, crimson center.
- Golden Loosestrife.** Yellow.
- Helenium rubrum.** Bronze.
- Hemerocallis flava** (Lemon Lily). Clear full yellow.
- Hemerocallis kwanso.** Rich golden bronze flowers.
- Hemerocallis thunbergi.** Pale yellow.
- Heuchera sanguinea album.** White flowers.
- Lily-of-the-valley.** White.
- Lupines, Downer's Hybrids.** All colors.
- Lychnis chalcidonica.** Vivid scarlet flowers.
- Monarda didyma.** Red.
- New England Aster.** Rose.
- New England Aster.** Purple.
- Oenothera youngi.** Yellow.
- Oriental Poppy.** Orange.
- Pentstemon barbatus torreyi.** Scarlet flowers. 15c. each, \$1.50 per doz.
- Platycodon grandiflora.** Blue.
- Platycodon grandiflora alba.** White.
- Physostegia virginica.** Delicate pink.
- Physostegia virginica alba.** Pure white.
- Pyrethrum.** Mixed, all colors.
- Rudbeckia purpurea** (Giant Purple Cone-flower). Purple flowers with very large, cone-shaped center.
- Saxifraga megasea cordifolia.** Pink flowers.
- Sedum spectabile.** Rose color.
- Shasta Daisy.** White.
- Stokesia cyanea.** Lavender flower.
- Thalictrum aquifolium.** White.
- Thalictrum glaucum.** Chinese yellow.
- Thermopsis caroliniana.** Yellow flower, similar to the Lupine.
- Thymus serpyllum.** Purple lilac bloom.
- Tradescantia virginiana** (Jobs-tears). Blue.
- Veronica spicata.** Dwarf, violet blue.

CLEMATIS

Vines

- AMPELOPSIS heterophylla.** Each 10
Deeply cut leaves with berries changing from lilac, pink and green to bright blue. 3 yr. \$0.75
- AMPELOPSIS quinquefolia**
(Virginia Creeper). 2 yr.35 \$3.00
3 yr.50 4.50

- HYDRANGEA petiolaris** (Climbing Hydrangea). 12 to 18 in. (from 3 in. pots)75
- WISTERIA, Chinese.** 2 yr.60 5.00
XX, transplanted. 1.00
XXX, transplanted... \$1.50 to 15.00

FLOWERING SHRUBS

Note—We have, in addition to sizes priced below, in most varieties, large specimens that are broad, bushy, and have a fine root system, developed from frequent transplanting. Our customers have found that these large shrubs can be as safely moved as the smaller sizes. They range in size from 4 to 10 feet. Write for prices. An old customer writes concerning his order of very large shrubs. "What splendid fibrous root systems the shrubs you sent me all had! You have reason to be proud of such stock."

Bearing-Size and Early-to-Bear Fruit Trees

LARGE SELECTION

We offer a well-tested list of Fruit Trees at the lowest prices at which Rosedale transplanted trees have ever been sold. Many varieties 4 to 8 years old are already bearing fruit. A mass of fibrous roots insures success in transplanting. Smaller sizes for those who prefer to wait.

STANDARD APPLES

	2 yr. No. 1 Grade	3 Yr. No. 1 Grade	5 yr. Over 1 in. caliper
Baldwin. Bright red. Very productive.....	\$0.75	\$1.00	\$2.50
Cortland Improved McIntosh. Bright red, productive....	.75	1.00	2.50
Delicious. Brilliant dark red. Sweet, juicy.....	.75	1.00
McIntosh. Dark red, flesh white. Nov. to Feb.....	.75	1.00	2.50
Northern Spy. Dark red; one of the best eating Apples. Good keeper.....	.75	1.00
Red Astrachan. Crimson, streaked yellow. July, Aug.....	.75	1.00
R. I. Greening. Constant bearer, one of the best for cooking..	.75	1.00	2.50
Spitzenburg. Deep red. Flesh yellow.....	2.50
Wealthy. Dark red and yellow; flesh white. Subacid. Oct..	.75	1.00	2.50
Yellow Transparent. Skin pale yellow. Subacid. Aug....	.75	1.00	2.50
Hyslop Crab.75	1.00

DWARF APPLES

Our Dwarf Apples are budded on Doucin stock and eventually attain a height of 12 to 20 feet, according to the varieties, soil, etc. They may be planted from 12 to 20 feet apart. They are incomparably better than trees grafted on Paradise stock, which dwarfs the trees to mere babies capable of bearing but few fruits, even at maturity.

Dwarf Fruit Trees come quickly into bearing, take up little room, are easily pruned and sprayed, and are especially recommended for the small garden and as fillers in orchards of standard trees.

	No. 1 Grade 2 yr. old $\frac{3}{8}$ in. cal. and over	3 Yr. Once Transplanted	5 yr.
Baldwin.	\$1.00
Cortland.	1.00	\$1.50
Delicious.	1.00
McIntosh.	1.00	\$3.00
R. I. Greening.	1.00	1.50	3.00
Wealthy.	1.00
Yellow Transparent.	1.00	1.50	3.00

CHERRIES

Budded on Mazzard stock, which is conceded by commercial growers to be the finest for productiveness.

All varieties, 2-yr.-old, No. 1 Grade, \$1.00 each, \$8.00 for 10

SWEET VARIETIES

Black Tartarian. Vigorous grower. Large, black fruit; juicy; sweet. Early.
Governor Wood. Vigorous grower. Medium sized fruit. Red; delicious. Early.
Napoleon Bigarreau. Bright red, large fruit. Ripens early.
Schmidt's Bigarreau. Purplish red. Ripens early. Popular.

SOUR VARIETIES

English Morello. Very dark red. Ripens early.
Montmorency. A large, red, acid fruit. Very productive and easy to grow.

PEACHES

No garden is too small to have at least one Peach tree. Peaches come into bearing from the second to the fourth year and bear enough the fourth year and thereafter to make them well worth while. And what a luxury when they are ripened on the tree !

All varieties, first-class, selected trees, 1-yr., 4 to 6 ft., very fine, 60c. each, \$5.00 for 10

- Belle of Georgia. Flesh white. Midseason.
- Carman. Pale yellow, with deep blush. August.
- Champion. Large, splendid red and white.
- Crawford's Late. Superb yellow Peach. Mid-September.
- Elberta. Flesh yellow, juicy. Ripens between Crawford Early and Late.
- J. H. Hale. Large. Early September. Yellow.

PEARS

We offer a list of well-tested Pears. In addition to the 2-year-old trees usually sold, we offer in most varieties 4- and 5-year transplanted trees. These extra size trees, having well-developed roots, will soon come into bearing. In fact, some of them have borne fruit in the nursery the past year.

Dwarf Pears are those budded on Quince stock and are particularly desirable for gardens. Many fruit growers find them profitable for market. Like the Dwarf Apples, they are easy to prune and spray, and the fruit is easily gathered. Orchardists find a combination of dwarfs and standards profitable.

	Standard 2 yr. old No. 1	Standard 5 to 7 ft. XX trans.	Dwarf 2 yr. old No. 1
Bartlett. One of the best known Pears. Early Sept.....	\$0.75	\$1.50	\$0.75
Clapp's Favorite. Resembles Bartlett, ripens a few days earlier	.75	1.50	.75
Bosc. Large, russety Pear. Unsurpassed.....	.75
Seckel. Strong grower and good bearer.....	.75	1.50	.75
Sheldon. Large, round, russet; very juicy, melting and vinous.	.75	1.50

PLUMS

If purchasers of fruit trees knew how delicious Plums are when picked ripe from the tree, nurserymen would need largely to increase their stock of these fruits. Occasionally visitors at the nursery say to us they do not wish to buy Plum trees, as the fruit is so sour. The reason for this is that their experience has been with fruit purchased at the store and picked long before it was ripe. No fruit herein listed is sweeter than Plums, well ripened on the tree.

	No. 1 Grade 2 yr. old	5 yr. Ready to bear XX trans.
Abundance. Large; amber; sweet. Early.....	\$0.75	\$2.50
Burbank. Cherry-red. Good producer. Early.....	.75	2.50
German Prune. Dark purple. A great favorite. Late.....	.75	2.50
Imperial Gage. Yellowish green. Flesh rich and sweet. Very productive. Mid-August.....	.75	2.50
Shropshire Damson. Dark purple. Excellent for preserving.....	.75	2.50
Yellow Egg. Yellow Plum. Last of August.....	.75	2.50

SELECTED FIRST-CLASS

QUINCES

Quince trees are both useful and ornamental. When covered with beautiful blossoms in the Spring they are most ornamental and the delicious jellies made from their fruit are very valuable.

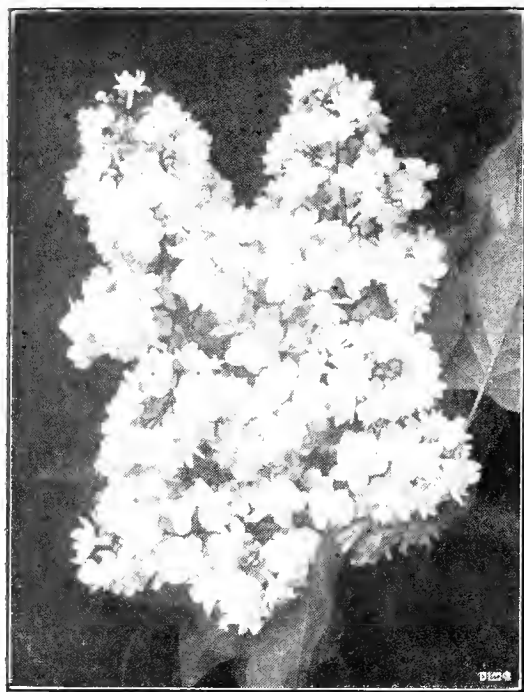

All varieties, 2-yr.-old, No. 1 Grade, 75c. each, \$6.00 for 10, 3 yr., \$1.00 each

- Orange. Large, round, golden yellow. October.
- Rea's Mammoth. Large, fine variety of the Orange Quince. Vigorous and productive.

HARDY GRAPES

All varieties, first-class, 2-yr., 30c. each, \$2.00 for 10; 3-yr., transplanted, 50c. each, \$4.00 for 10

- Caco. Red, large, fine flavor.
- Concord. Best known and most successful Grape in this section. Blue-black.
- Worden. Seedling of Concord but ripens ten days earlier and is superior in flavor.
- Brighton. Early, vigorous and productive Red.
- Delaware. Sweet and vinous. Red.
- Niagara. Pale green, sweet, ripens with Concord.

DOUBLE LILAC

FRENCH HYBRID LILACS

Almost everybody knows and loves the old-fashioned purple Lilac, but only a few know how exquisitely lovely the French Hybrids are. They are just as easy to grow, and bloom when they are even younger. The flowers are relatively huge, and are borne in enormous clusters, sometimes six or seven clusters combined in one great truss. We list fifteen single and double kinds in a complete range of color.

Belle de Nancy. Double, rose lilac.
Charles Joly. Double, crimson purple.
Charles X. Single, bluish violet.
Congo. Single, dark ruddy purple.
Jan Van Tol. Single, pure white.
Katherine Havemeyer. Double, light violet.
Marie Legraye. Single, creamy white.
Miss Ellen Willmott. Double, pure white.
Mme. Casimir-Perier. Double, white.
Mme. Lemoine. Double, snow white.
Mrs. Edward Harding. Double, reddish purple.

Philemon. Single, pale purple.
President Fallieres. Double, pale lavender.
President Grevy. Double, soft bluish lilac.
Souv. de Ludwig Spaeth. Single, crimson purple.

All Hybrid Varieties: Each
 2 to 3 ft. plants, budded and dug with ball of earth.....\$1.00
 3 to 4 ft. 1.50
 Larger plants up to 8 ft. available in some varieties.

Vulgaris (Common Purple Lilac). The old-fashioned, fragrant kind.
 2 to 3 ft., each \$0.75 | 3 to 4 ft., each \$1.00

Vulgaris alba (Common White Lilac). Charming old variety. Very sweet.
 2 to 3 ft., each \$0.75 | 3 to 4 ft., each \$1.00

High Spots of the Peony World

For over 25 years Peonies have been a leading specialty at Rosedale. Hundreds of varieties have been tested, and we now offer the following list of varieties, which have stood the test.

Size of Plants—We offer 3 sizes; 3 to 5 eye divisions, 1 year, 2 year, with a balanced root system. We recommend one and two year sizes for immediate results.

Culture—Peonies are extremely easy to grow, and stand shipping and handling better than most Perennials. They like rich, deep loam with an abundant supply of moisture. Do not use fresh manure near roots. Plant in September or October; cover eyes not over 2 inches.

Two-year plants are available only in the varieties marked *. For prices of 2-year size, double the price of divisions. Postage prepaid east of Mississippi on orders of \$2.00 or more. Add postage as indicated on special collections

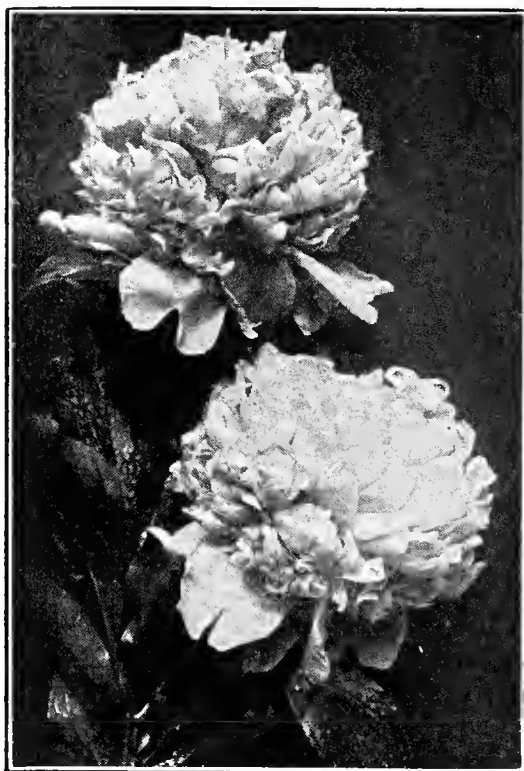

DOUBLE PEONIES

3-5 eye 1 yr.

Adolphe Rousseau. 8.5. Glossy, purplish garnet; one of the darkest, very large, semidouble. \$0.75 \$1.00

Popular Priced German Iris

Our extensive stock of these popular plants, makes possible the largest plant at the lowest price. Recent introductions are included at popular prices. Postage prepaid on orders of \$2.00 or more east of the Mississippi, except on special offers.

German Iris like plenty of sun and well drained soil. Early Fall planting gives best results. Plant so that the rhizome or bulb is level with the surface of the ground and firm the soil well.

Numerals following names indicate ratings by American Iris Society. S. means standards or upper petals; F. means falls or lower petals.

GERMAN IRIS

Afterglow. 8.6. Exquisite blend of lavender, buff, gray and light yellow. Fragrant. 15c.

Our knowledge of plants and our experience in handling them make us the logical people to consult when you are considering planting. We are prepared and equipped to give you a complete landscape service, from designing to planting, grading and seeding. Our stock is most inclusive, from material for the perennial garden to large trees for immediate effect. During the past 33 years we have planted hundreds of homes and estates to the entire satisfaction of their owners.

JAPANESE IRIS

The blooms of the Japanese Iris are 6 to 10 inches in diameter. They will grow in almost any soil that does not become too dry in Summer, but they prefer a warm, sunny location.

The best time to plant is July, and from then on until the middle of September the plants may be safely planted in localities not too far north, so that they may have time to establish themselves before cold weather sets in. If they are planted rather late, they should be freely mulched after the ground is frozen in late Autumn to keep the ground from heaving.

Each Doz.

SPECIAL OFFER

100 Siberian Iris (Mixed) \$5.00

PHLOX

Following the Irises and Peonies in time of bloom, but in no way behind them in popularity, are the Hardy Perennial Phloxes. We have weeded out all the magentas and purples, and believe that our list is as select as that offered by any firm.

Phloxes are shallow-rooted plants and should, therefore, be planted a little deeper than most plants and kept well tilled to conserve the moisture, as they cannot stand dry, packed soil like Peonies and Irises. No fertilizer should be near the roots. A little bone-meal sprinkled on the surface of the ground before hoeing gives good results, but be careful not to use too much.

Shipped after September 1 Parcel Post prepaid

2-yr. Blooming Size Plants, 25c. each, \$2.00 for 10; 5 at 10 rate

Baron Comte. Satiny purple.

Baron von Dedem. Blood red.

Queen. Pure white. One of the best.

R. P. Struthers. Rosy red with crimson eye.

Sir Edward Landseer. Bright crimson.

W. C. Egan. Pleasing shade of soft pink.

ROSEDALE SOIL

Not the least factor in the success of Rosedale Nurseries has been its perfect soil. Did it ever occur to you that the most important requisite for good trees is good soil—soil in which they find just the ingredients that make them grow clean and thrifty? Rosedale soil seems to have been made on purpose for a nursery. At a bend in the Saw Mill River, where the valley is considerably widened, this old river-bottom has been greatly enriched, not only by the sediment brought down the stream at flood-tide, but by the washing down of the good soil and leafmold from the surrounding hills. We thus have a gravelly loam, superimposed on a clay subsoil. This not only tends to grow masses of fibrous roots but also to form a solid ball of earth for handling of evergreens. Owing to this soil being naturally rich in tree ingredients, the trees do not have to be forced by intensive fertilizing which tends to make hothouse growth.

Rosedale Roses

A select list of the very finest in hardy varieties, which will bloom abundantly, without fussing. Plant in April or early May and you will enjoy a quantity of blooms by mid-June. Every plant is a selected specimen, strong and healthy, fully 2 years old, completely field grown, especially for garden planting.

We believe no finer plant is offered anywhere, at any price and any plant that does not measure up to our description may be returned and money will be refunded.

Please order early. Shipments begin about April 1st, but shipment will be made on any date specified after April 8, 1935.

Hybrid Teas

Bloom June to November

Autumn. Burnt orange buds opening to very double, bright yellow flower streaked with red. Free flowering. 75c.

Betty Uprichard. Copper red in the bud, opens orange carmine with salmon reflexes. Spicy fragrance. One of the very best older varieties. 70c.

Chas. K. Douglas. Long pointed buds opening to large flowers of crimson scarlet. Strong grower of upright habit. Highly recommended. 70c.

Chas. P. Kilham. A newer variety with large, beautifully shaped blooms of brilliant orange pink, suffused with glowing yellow. Slightly fragrant. Vigorous grower. 70c.

Columbia. Bright pink, sweetly scented flowers. Free flowering, good growth. 60c.
